SAST NEWS:
For your SAP Security & Compliance

Dear readers,

I hope you've found time to enjoy your summer in between smaller and larger projects.

We are now at the ready for the event of the year in the German-speaking world of SAP, the **DSAG Annual Congress**. The trade fair doors will be open from September 17 to 19 in Nuremberg. We can't wait to present our solutions to you there in person and to be able to talk to you.

As we are all well aware, there is a lot happening right now, which is why now is the time to look ahead and get down to detailed planning in earnest: Where is your focus now? What path are you planning to take in the coming years? Whether this is the upcoming S/4HANA migration, your authorization concept redesign or real-time monitoring of your systems, come visit our stand and we will develop tailored solutions to ensure the security and compliance of your SAP systems.

In particular, I would like to recommend our **partner session with Renk AG** at which you can learn how to easily streamline your SAP roles, while conserving resources and efforts at the same time.

Apropos detailed planning: You can read about our take on sound business planning and what makes a good service provider in the interview I gave as part of the **Softshell Vendor Awards**.

On that note, I hope you enjoy the read and am looking forward to seeing you in Nuremberg,

Bodo Kahl

DSAG Annual Congress September 17-19, 2019:
Renk AG presents SAST Self-Adjusting Authorizations

The SAST team will once again present customized scenarios for your SAP Security & Compliance at the AKQUINET booth - whether for SAP ERP or S/4HANA systems.

This year's highlight: The partner presentation by Frank Schröder (Renk AG), who will share his experiences with self-adjusting roles and authorizations of the SAST SUITE on Sep 17, 2019.

SAST SOLUTIONS honored with Softshell Vendor Award in Gold

Each year, Softshell AG honors security providers for outstanding successes in the German-speaking market.

Only three percent of all providers analyzed were honored with GOLD, the highest accolade, also the SAST SOLUTIONS of akquinet AG.

RFC interfaces: How to get rid of your legacies

Do you have an overview of the RFC interfaces in your SAP systems?

The larger the company, the more interfaces there are. Unfortunately, these are often not taken into account when securing IT systems, thereby allowing hackers free access to sensitive data.

The name of the game for SAP managers is therefore: Clean up and check!
